

## Measham Medical Unit Patient Transport Service

### The Surgery Shuttle – ‘The Gift of a Lift’

On the 22<sup>nd</sup> February a new shuttle bus service for the over 55yr old patients of Measham Medical Unit is being launched.

The minibus has been generously donated and fully funded by the Barbara Boardman-Weston Charitable Trust. Barbara was a patient at the surgery for many years and in her memory, her husband and sons have set up the charitable trust.

The new 15 seat minibus is fully adapted to carry persons with mobility difficulties and can safely carry up to two wheelchair passengers, having an electric tail lift fitted.

Patients using the service will need to allow some flexibility in their pick up and return delivery times, to allow for a variety of passengers attending appointments around the same time.

The Boardman- Weston family, all the doctors and staff at Measham are delighted with this new evolving service; we know that ‘The Gift of a Lift’ will make a real difference to our patients.
